

The Commonwealth

ARTIFICIAL INTELLIGENCE REPORT

Report Created For:
The Secretary General of The Commonwealth of Nations

The Commonwealth

FOREWARD

I am proud to share the Secretary General's Special Report on the progress of Artificial Intelligence within our Commonwealth family.

Diligently compiled and scrupulously researched over the past two years with the Economic Forum for Sustainable Development, this seminal report is a reflection of our collective commitment to Artificial Intelligence and the well-being of our global community. It draws upon credible open sources including the United Nations, the World Bank, and the International Monetary Fund, representing an extensive effort in data collection and analysis. Providing a clear, comprehensive, and definitive assessment of the progress made in Artificial Intelligence, it highlights both our collective achievements and the challenges that lie ahead. It is my hope and expectation that this report will serve as a valuable resource for decision-makers, executive-level leaders, and government officials across our member states. The information it contains is crucial for informed policy-making, enabling each of our nations to design and tailor strategies which are both effective and context-specific. Since assuming office as Secretary-General, I have placed Artificial Intelligence at the forefront of the Commonwealth's agenda. This commitment is not only a reflection of our shared values and aspirations but also a testament to our dedication to reshaping a world which is better, more prosperous, more sustainable and more secure for all. The findings and insights contained within this report are the latest manifestation of this commitment, and they underline how the effective use of data can improve policy and decision-making.

I trust that this report will prove to be an invaluable tool for your governments, helping to steer your efforts in furthering the agenda of Artificial Intelligence. It is my sincere hope that through collective action, shared knowledge, and the unwavering dedication which is the hallmark of the Commonwealth, we can accelerate our progress towards achieving Artificial Intelligence, thus forging a brighter future for our family of nations and the world at large. I look forward to your active engagement with the findings of this report, and I remain your Commonwealth servant, as we continue our partnership to build a more equitable and sustainable global community

Yours sincerely,

The Rt Hon. Patricia Scotland KC
Secretary General of the Commonwealth

Artificial Intelligence Readiness Index - 2023

Government AI Readiness Index aims to provide valuable insights for effective and responsible AI integration into public services. AI is being used with the goal of improving efficiency in the delivery of services, ensuring fairer access to services, and enhancing citizens' experience of services.

AI Readiness Index answers **how ready is a given government to implement AI in the delivery of public services to their citizens?**

AI Readiness Index - Total Score by Commonwealth Country

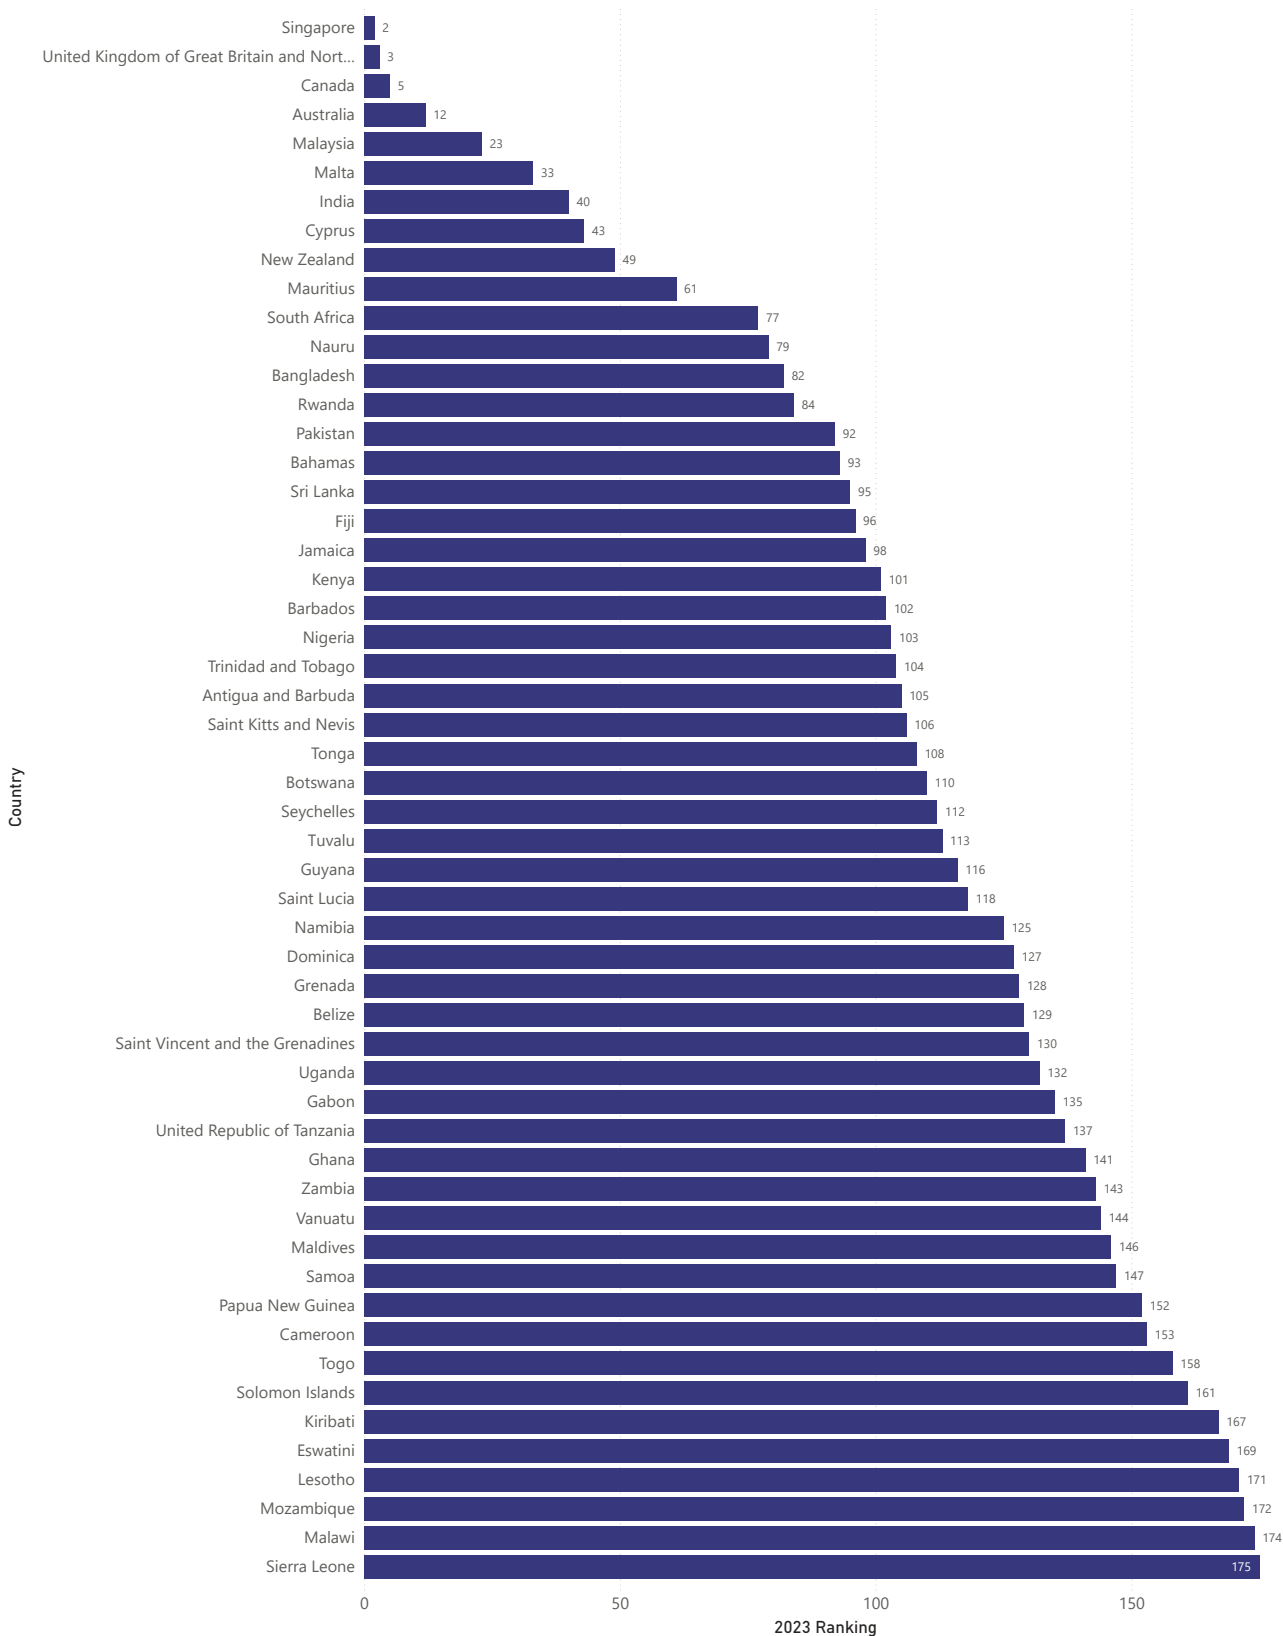

Measure: Score Out of 100

Economic Forum for Sustainable Development is a dynamic and forward-thinking consortium dedicated to advancing sustainable economic growth worldwide. Our mission is to bridge the gap between economic development and environmental stewardship through innovative solutions, collaborative partnerships, and policy advocacy. The EFSD serves as a platform for thought leaders, policymakers, and industry experts to exchange ideas, foster sustainable practices, and drive impactful change. Our commitment is to shape a future where economic progress and sustainability are harmoniously aligned for the betterment of societies and the planet.
